

# # # Shraddha Ques 2 Assign 3 ##

ASO2	Level 4	Level 3	Level 2	Level 1
communication	colouring to add to understanding, input one colour/output another	Flowchart - organized, proper spacing, correct symbols, proper language	Poor spacing, some incorrect symbols, typing errors	poor organizations, many symbols used incorrectly for the concept attempting to convey, arrows in the wrong section or incorrect pointer
	Excellent	Comments: useful succinct (clear OK), not sparse at top (modifications start date, progiz - name, problem description, Notes, special or unusual, citations) Readability - code is easy to follow, enough white space	Adequate	Any two or more details missing or Citations/borrowed work not acknowledged OR more than 25% of code borrowed
	User instructions that are clear and can be accessed at any time or Additional options, like premature quit	User interface: clear language, no grammar or spelling errors I/O either CSV or txt - Open and closing proper reading of all elements in the file and placing in an array/class	2 or 3 grammar or spelling errors	Needs improvement
Knowledge Thinking & inquiry	With open or similar more advanced coding	I/O - proper chart (headings), steps, proper terminology	I/O opens and closes properly but may be inefficient OR may be skipping certain lines/words	hard coded words and forgot to close files
Thinking & inquiry	Description at top to clarify	Graphics are appropriate and professional looking for Hangman - word list appropriate	Unclear steps or incorrect terminology	missing information in columns or steps missing
	Screen sizes to user systems Make it interactive. Colour or design helps user know what stage they are at	Graphics are appropriate and professional looking for Hangman - word list appropriate	Small graphics, features not intuitive	No graphics, just console that user would not necessarily have. Lost count on number of guesses
Application	Could be class based Highly efficient, best possible, perhaps found a new function or way to complete the task	All functions (including user) are efficient and work as intended	Variable names don't match or missed a step Functions work, but confusing or inefficient	more confusing, complicate the existing error, or do not recognize it
		Clear step function	Nested if's or lack of proper loops - does not take advantage of built in functions	Hard coded where a user defined function or built in would suffice
				No functions or classes

Flow Good, IPO OK, Trace OK Forgot to file I put one in to check.

Was expecting turtle or Pygame version.

Had read word 1st time, 2nd time secret became the word - oops - needed to make appropriate modifications.

check again Resent?
