

#13 Q1. Question 1 Assam 3 #7

A3Q1

Level 4

Level 3

Level 2

Level 1

colouring to add to understanding, input one colour/output another

Flowchart - organized, proper spacing, correct symbols, proper language

Poor spacing, some incorrect symbols, typing errors.

poor organization many symbols used incorrectly for the concept attempting to convey, arrows in the wrong section or incorrect pointer.

Comments - useful succinct, (block OK), not sparse, block at top (modifications, start date, programmer name, problem description, Notes on analysis, special or unusual, citations) Readability - code is easy to follow, enough white space

lacking explanation, inline comments, Citations/borrowed work not acknowledged OR more than 25% of code borrowed

Excellent

Needs improvement

Inconsistent parameters in base case - works, but parameters defined in such a way as to make it more complex than required

Not sure of base case, could have an error an not end properly missing information in columns or steps missing

Error checking.

Description at top to clarify

Rotate - above expectation.

Stops mid way (typically error possibly handled)

more confusing, complicate the existing error, or do not recognize it.

Trace statements - variable name, steps and changes (Table/chart)

Variable names don't match or missed a step

Recursion - it works (base case) - Steps - (needs to be truly recursive) - function better into function or class.

missing base case, hardcoded or error checked so infinite loop does not exist

Extreme failure

No functions or classes does not take advantage of built in

Could be clarified perhaps follow function or

Application

Grithab rich in sociology - 75 commits Trace table date + # in Grithab not found - Adding code piece will touch would rather have date + #. Thank you for Jpa. Comment Inline about set heading Entered 45 - get Blank Screen, no error, nothing Visible - I Ent. Then read you comment about mouse click. Works just fine! Nice snowflake
