B	2	1 1	_	<u>.</u>	<b>X</b>	1 1 -
Level 1	Any two or more details missing or Citations/borrowed work not acknowledged OR more than 25% of code borrowed	Needs improvement User interface not clear, poor language and or spelling and grammar errors	hard coded words and forgot to close files missing information in columns or steps missing	No graphics, just console that user would not necessarily have Lost count on number of guesses.	more confusing, complicate the existing error, or do not recognize it.  Hard coded where a user defined function or built in would suffice	No functions or classes poor organizations, many symbols used incorrectly for the concept attempting to convey, arrows in the wrong section or incorrect pointer.
Level 2	lacking explanation, inline coments, or hard to read, or spelling mistakes on output or Progammer missing or modifications	Adequate 2 or 3 grammar or spelling errors	data, few minor errors  Unclear steps or incorrect terminology	Small graphics, features not intuitive.	Trace statements - variable name, Variable names don't match or missed a existing error, or do not steps and changes (Table/chart) step  All functions (including user) are functions work, but confusing or function or built in would	ake advantage of built in age. some incorrect symbols, rs,
Level 3	Comments - useful sincinct, (block OK), not sparse, block at top (modifications, start date, programmer name, problem description, Notes on anything special or unusual, citations) Readability - code is easy to	user interface, clear language, no grammar or spelling errors		Graphics are appropriate and professional looking for the word list appropriate components - Standard screen size 1280 x 1024 s	Trace statements - variable name, valeps and changes (Table/chart) s All functions (including user) are Fefficient and work as expected in	Code efficiency - nested if's better of into function or class.  Flowchart - organized, proper spacing, correct symbols, proper language
Level 4	Nothing assumed, catching errors, anticipating users needs - beyond Level 3	User instructions that are clear and can be accessed at any time or Aditional options, like premature quit.  With open or similar more advanced coding - not required or not taken in class OR new or better.	implementataion of class work Description at top to clarify	Screen sizes to user systems.  Make it interactive. Colour or design helps user know what stage they are at.	Could be class based	Highly efficient, best possible, perhaps found a new function or Codway to complete the task into colouring to add to understanding. Flow input one colour/output another lange.
