	Level 4	Level 3	Level 2	Level 1
communication	colouring to add to understanding, input one colour/output another	Flowchart - organized, proper spacing, correct symbols, proper language	Poor spacing, some incorrect symbols, typing errors,	poor organizations, many symbols used incorrectly for the concept attempting to convey, arrows in the wrong section or incorrect pointer.
		Comment (block O... t ... top (mo... program... descript... special	lacking explanation, inline coments, or hard to read, or spelling mistakes on output or Progammer missing or modifications	Any two or more details missing or Citations/borrowed work not acknowledged OR more than 25% of code borrowed
Knowledge Thinking & inquiry	Excellent	Readability - code is easy to follow, enough white space	Adequate	Needs improvement
	Error checking.	recursion - identifies base case and parameters, call function IPO - proper chart (headings), steps, proper terminology Proper Koch snowflake	Inconsistent parameters in base case - works, but parameters defined in such a way as to make it more complex than required	Not sure of base case, could have an error an not end properly
	Description at top to clarify	reiterated and created in front of the user	Unclear steps or incorrect terminology	missing information in columns or steps missing
Thinking & inquiry	Rotate - above expectation.	Trace statements - variable name, steps and changes (Table/chart)	Stops mid way (typically error possibly handled)	
		Recursion - it works (base case) - Steps - (needs to be truly recursive) - function better into function or class.	Variable names don't match or missed a step	more confusing, complicate the existing error, or do not recognize it.
Application	Could be class based perhaps found a new function or		missing base case, hardcoded or error checked so infinite loop does not exist does not take advantage of built in	Exteme failure No functions or classes

Github - financi   64 commits - help function great - glitch -
turtle snow repeating in one spot. Typed in help - worked -
re-clicked on active turtle screen settled down, but only
receiving int. screen ?!.. Talk to Thomas - serious error.
